SUMMARY

As a frontend developer, I embrace React and am deeply passionate about crafting modern, responsive, and user-centric web applications. My expertise includes React.js, API integration with Axios, UI frameworks like Ant Design, TanStack Query for efficient data fetching, and Zustand for state management. I also have hands-on experience with backend development, including REST APIs, authentication, image uploads with Cloudinary, and CRUD operations. I am currently enhancing my full-stack development skills, focusing on clean, scalable, and efficient code

EXPERIENCE

Digitech Infra Associates

React Developer

9 - NOV - 2024 - PRESENT

Responsibilities:
- Developed and designed user-friendly UI components using modern frontend technologies.
- Integrated RESTful APIs to connect frontend interfaces with backend services.
- Performed bug fixing and performance optimization to ensure smooth user experience.
- Managed and maintained project folder structure for better scalability and code readability.
- Worked on frontend development from design implementation to deployment.

EDUCATION

St. Patrick's High School, Karachi

INTER, Computer Science

2022 - 2024

Virtual University of Pakistan (VU)

Bachelor of Computer Science

2025 - PRESENT

Aptech Pakistan

Software Engineering, Computer Programming

2022 - 2024

SKILLS

HTML , CSS , JAVASCRIPT , REACTJS , TYPESCRIPT , TAILWIND , TANSTACK , RESTAPIs , ZUSTAND , EXPRESS , NODEJS , MONGODB , AXIOS

PROJECTS

Amy Grill & Graze (Restaurant Management System)

Add a suTech Stack: React (Vite), Tailwind CSS, TanStack Query Developed a fully responsive restaurant website with modern and VIP UI, including pages for menu, reservations, gallery, and contact. Focused on efficient data management and API integrations
bheading

JS Global WhatsApp Chatbot

Developed an intelligent chatbot system to assist users with account opening procedures and service inquiries. Implemented real-time chatting functionality using Pusher, ensuring smooth and instant communication between users and the system.

Aspire (WhatsApp Chatbot)

Developed an intelligent chatbot system to assist users with account opening procedures and service inquiries. Implemented real-time chatting functionality using Pusher, ensuring smooth and instant communication between users and the system.

Yacht Management System

Designed and developed a role-based yacht management system with three user types — Admin, Sales Person, and Customer. Integrated features like yacht booking, maintenance tracking, and calendar-based scheduling to manage availability and streamline operations.

Smart Society (Society Management System)

Developed a complete society management platform to handle resident operations efficiently. Integrated key modules such as Complaint Management, Bill Payment with proof upload, and other essential community management features.

Event Link (Event Management System)

Built a dynamic event management platform with an interactive dashboard to monitor and organize events efficiently. The system supports two roles — Super Admin and Event Organizer — enabling seamless event tracking and management.

Pakistan Cable (CRM)

Developed a comprehensive CRM system for managing the sales team and tracking performance. Implemented multiple modules including User Management and Team Management to streamline operations and improve productivity.
